Affidavit in Support of Motion to Appeal in Forma Pauperis in Hedling v Lohan US District Court District of Columbia Case No: 1:26-cv-01714-UNA

Text of Article 16

"Everyone shall have the right to recognition everywhere as a person before the law."

Citation

• Full Treaty Name: International Covenant on Civil and Political Rights (ICCPR)
• Adopted: December 16, 1966 (by UN General Assembly resolution 2200A (XXI))
• Entry into Force: March 23, 1976
• Publication / Official Citation: 999 U.N.T.S. 171 (United Nations Treaty Series, volume 999, page 171)
• Bluebook Citation Format: International Covenant on Civil and Political Rights, art. 16, Dec. 16, 1966, 999 U.N.T.S. 171.

The Plaintiff filed this instant lawsuit May 11, 2026 requesting the following relief after rejections of emergency filings in the US District Court District of Delaware

“WHEREFORE, Plaintiff, BOREALIS S HEDLING demands judgment against Defendants, RANDALL C LOHAN, THE UNITED STATES SENATE, DONALD J TRUMP be compelled to never reject emergency filings against international instruments ever again and immediately ratify the UN Convention on the Rights of Persons with Disabilities, as well as pay interest, costs, punitive damages, attorney’s fees, and such other relief as this Court may deem just and proper. The People via a Jury are the only competent authority to judge this case.”

Noting the underlying relief in the rejected filing a May 10, 2026 EX Parte Emergency Motion to Reopen, Intervene, and for EX Parte TRO in US District Court District of Delaware Case No 1:21-cv-01490-CFC

“Wherefore the Plaintiff Prays the Court
1. Compels the US District Court District of Delaware Clerk to note in the Docket Text at ECF 780 in line with Article 16 of the General Data Protection Regulation “Borealis Serenity Hedling is a Human Being. Who uses the pronouns they / them”.
2. Compels the US District Court District of Columbia Clerk to note in the Docket Text at ECF 230-2 in US District Court District of Columbia Case No 125-cv-0766-JEB JGG et al v. Trump et al in line with Article 16 of the General Data Protection Regulation “Borealis Serenity Hedling is a Human Being. Who uses the pronouns they / them”.
3. Any relief this Court Deems Just and Proper.”

On July 22, 2026 Judge Randolph D. Moss in retaliation for filing US District Court District of Columbia Case No 1:26-cv-0057-UNA Hedling v Johnson and US District Court District of Columbia Case No 1:26-cv-02113-UNA Hedling v Jackson et al. In violation of of Article 16 of the ICCPR Denial of Legal Personhood, Article 12-14 of the UN Convention Against Torture, and US Constitution Amendments 1, 4, 5, and 8. In addition the violations of 18 U.S.C. § 241. In addition to violations of the 2008 ADA Amended and Section 504 of the 1973 Rehabilitation Act. Issued a blanket order demanding dozens of filing fees to a destitute victim of torture. When the relief requested in those respective cases was:

Hedling v. Johnson

““Declaratory Relief
1. Declares Impeachment actions relating to violations of International Criminal Law can be brought actio popularis directly to the Senate as the House of Representatives is no longer a “competent authority”.
2. Declares Members of Congress can help human rights defenders no matter where they are located.
Injunctive Relief
1. Affirms this action meets the Requirements of being properly drafted Articles of Impeachment against Judge Trevor N McFadden. On the following 4 charges:
● “Violating Article 13 and 14 of the UN Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment.
● “Torture of a Human Rights Defender”
● “Failing to Postpone the 2024 Election undermining the Right of Self-Determination”
● “Participating in the Systemic Crime Against Humanity of Falsely Maintaining the Designation of being a Safe Third Country
2. Immediately informs Chief Justice John Roberts he will need to preside over Judge Trevor N McFadden's Trial in the Senate on an Emergency Basis.
3. Any relief this Court Deems Just and Proper.”

Hedling v Jackson et al.

“WHEREFORE, Plaintiff, BOREALIS S HEDLING demands judgment against Defendants, AMY BERMAN JACKSON, CLAUDIA BAIO, ADMINISTRATIVE OFFICE OF THE US COURT, ROBERT J CONRAD JR for the Declaratory Relief 1. Declares Clerks must follow Article 13 and 14 of the UN Convention Against Torture even when Article 3 Judges issue unlawful orders to suppress filings or gag victims of torture seeking redress in violation of 18 U.S.C. § 241,. As well as pay interest, costs, punitive damages, attorney’s fees, and such other relief as this Court may deem just and proper. The People via a Jury are the only competent authority to judge this case.”

On October 16, 2026 Judge Timothy J Kelly cemented the blanket July 22, 2026 order of Judge Randolph D Moss. Reinforcing systematic Denial of remedy as established in both his September 17, 2026 Denials in Hedling v Roberts et al US District Court District of Columbia Case No 1:26-cv-00526-UNA and October 1, 2026 Denial in CNN v Trump US District Court District of Columbia Case No 1:26-cv-03287-TJK. When the relief requested in those respective cases was:

Hedling v Roberts

“Declaratory Relief:
1. Declare only Juries and the US Supreme Court have personal jurisdiction over Borealis S Hedling.
2. Declares the Plaintiff is immune from court fees.
3. Declares the US Supreme Court and Juries are the “competent authority” under Article 13 of the UN Convention against Torture to provide prompt and impartial review to the Plaintiff
Injunctive Relief:
1. Require all Federal Judges to annually review the Istanbul Protocol: Manual on the Effective Investigation and Documentation of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (2022 edition).
2. Immediately Transfer the following case to the US Supreme Court Original Jurisdiction Docket
US District Court District of Columbia Case No 1:25-cv-04062-UNA
Hedling
v.
Meek et al.
3. Immediately have the 6 Justices who declared the President was immune from International criminal law recuse themselves in all matters regarding Borealis S Hedling
4. Any relief this Court Deems Just and Proper.”

CNN v Trump

“MOTION TO RECTIFY PRIOR ORDERS
Under Article 16 GDPR, 28 U.S.C. § 1651, and the Court’s inherent authority, the Intervenor requests rectification of orders issued since October 2024 that:
- ignored evidence of torture
- relied on incomplete factual records
- directed the Intervenor to inaccessible forums
- failed to address international law obligations implemented through federal statutes

For the foregoing reasons, the Proposed Intervenor respectfully requests that the Court:
1. Grant intervention under Rule 24(a) or 24(b)
2. Recuse Judge Timothy J. Kelly
3. Add Judge Kelly as a defendant for declaratory relief

4. Rectify prior orders
5. Appoint counsel
6. Grant any other relief the Court deems just and proper”

Finally on October 26, 2026 in response to a October 11, 2026 “COMBINED MOTION TO RECUSE, RECONSIDER, ADD DEFENDANTS, AND FOR EX PARTE TEMPORARY RESTRAINING ORDER” in this case Judge Trevor N McFadden. Even with relief requested in US District Court District of Columbia Case No 1:26-cv-0057-UNA seeking to Impeach him actio popularis. Prior direct litigation under the Plaintiff's dead and former legal name in US District Court District of Connecticut Case No 3:25-cv-00163-SVN Lawson v McFadden denied the below relief only sought because attempting CNN accountable in the Delaware Chancery Court via their parent corporation Warner Bros became another exercise in procedural violence.

“1. Recusal of the presiding judge.
2. Reconsideration of prior denials.
3. Addition of Defendants Renaud and Dolph.
4. EX Parte TRO compelling email filing.
5. Authorization for Mandamus against Renaud and Dolph.
6. ADA-compliant procedures for displaced persons abroad.
7. Recognition of fragmentation as disability-linked.
8. Any other relief the Court deems just and proper.”

The underlying question of why this relief was requested was already laid out plainly in another affidavit in Garmin v Patel as quoted below:

“The Appellant filed a March 31, 2026 Emergency Motion to Intervene, Appoint Counsel, Speedy
Hearing under Federal Rule of Civil Procedure 57, and for Partial Summary Judgment at ECF 5. The Presiding Judge per the now suppressed April 4, 2026 Motion to Reconsider, Clarify, Recuse, and Consolidate. Having been directly accused of violating Article 13 and 14 of the UN Convention against Torture in relation to Article 26 and 27 of the Vienna Convention on the Law of Treaties. Naming her as an active party in a concurrent lawsuit citing violating Article 4 Section 4 of the US Constitution in maintaining the 42 U.S.C. § 1983, 1985 (2+3), 1986 conspiracy to illegally operate the Domestic Violence Cash Benefit Program. Concurrent litigation against Chief Judge Boasberg, Judge Chutkan, and Judge Contreras for issuing decisions that amount to exploiting attitudinal biases around mental health to smear a neurodivergent Human Rights Defender. For pointing out US Judges are not Immune to International Criminal Law per US Circuit Court of Appeals Case No 25-5398 Lawson V The Department of Justice. Defamatory commentary such as the April 7, 2026 Minute Order only serves to legitimize the Appellant’s April 11. 2024-August 23, 2024 enforced disappearance, illegal incarceration, attempted extrajudicial killing via forcible Ativan Withdrawal, and effective trial in absentia using a Motion for a Continuance. For simply On February 27th 2023 the Appellant informed Astread Ferron-Poole chief of staff for the Connecticut Department of Social Services (DSS) they were not using all allowable proof of allegations for the Domestic Violence

Cash Benefit Program (DVCBP) P.A. 21-78 Section 14 (e). The language of Subsection B Conn Gen § 17b-112a is "plain" and "unambiguous"not subject to statutory construction by DSS under Conn Gen § 1-2z. That is essentially the only issue of law and the issue could have been solved with a single email.
Further noting that upon claiming Asylum in Canada August 24, 2024 to be immediately illegally detained for writing an Injunction showing the US was not a safe third country per Factor 3 Section 102 (2) of the Canadian Immigration Refugee Protection Act. That The Former President Joe Biden should have advocated immediately for the Appellant's release under the 1868 Hostage Act, 22 U.S.C. § 1732. Versus allowing a constructive refoulment to occur after 16 days of illegal detainment August 25, 2024-September 10, 2024 in violation of Article 3 of the UN Convention against Torture. That both 2024 US presidential Election candidates were informed of this and per the embedded April 4, 2024 Motion to Reconsider, Clarify, Recuse, and Consolidate. Judge McFadden allowed the election to illegally proceed undermining the Right to self determination. These issues were ripe. Further bolstered by the 103 pages of omitted filings showing the Appellant attempting to have numerous countries exercise universal jurisdiction to hold Donald J Trump accountable for the Crime Against Humanity of Mass Deportation. The only logical inference drawn from the April 7, 2026 is a desperate attempt to shield a judiciary that still since February 13, 2026 won't even provide the below relief requested in US District Court District of Columbia 1:26-cv-0526-UNA Hedling V Roberts et al.

"Wherefore the Plaintiff Prays the Court
1. Compels Every Federal Judge to Immediately Read the Istanbul Protocol: Manual on the Effective Investigation and Documentation of Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (2022 edition)
2. Immediately be required to Retake their Oaths of Office.
3. Any Relief this Court Deems Just and Proper"
"MINUTE ORDER denying 11 Request for Leave to File: The Court DENIES the request for leave to file. Proposed intervenor has not identified any non-frivolous ground for reconsideration of the Court's 10 order denying the motion to intervene. Nor is there any basis to clarify the Court's order. Proposed intervenor is not a party to this case, has filed motions without first conferring with the parties as required by Local Civil Rule 7(m), and has docketed material that is irrelevant to the case. The Court is not accepting additional filings from proposed intervenor on this docket. Signed by Judge Jia M. Cobb on April 7, 2026. (lcjmc3)" "

The Plaintiff repeatedly has unfortunately been denied access to assert appellate rights as instead of accommodating valid uses of Circuit Rule 25(g) by US Circuit Court of Appeals Clerk Clifton Cislak as detailed in US District Court District of Columbia Case No 1:26-cv-0327-UNA. Has routinely weaponized poverty and procedure to abuse his discretion in violation of international and domestic criminal law.

As asserted in the below Technical Preprint and request for Comments when Denial of remedy and Transnational Repression become legalized as Defacto overrides of Jus Cogens norms. There is no pathways to justice. As previously detailed in litigation such as Hedling v Meek et al

US District Court District of Columbia Case No 1:25-04062-UNA and Hedling v Treasury 1:26-00262-UNA. The Inter-American Commission on Human Rights and UN Committee Against Torture does not follow the Instanbul Protocols.

The Plaintiff in good faith absent legal support, medical care, and meaningful access to the Courts seeks to appeal as forcer ratification of the UN Convention on the Rights of Persons with Disabilities especially the below cited Articles is a necessary obligation under the Articles on the Responsibilities of States for Internationally Wrongful Acts.

**“Article 11: Situations of risk and humanitarian emergencies**

States Parties shall take, in accordance with their obligations under international law, including international humanitarian law and international human rights law, all necessary measures to ensure the protection and safety of persons with disabilities in situations of risk, including situations of armed conflict, humanitarian emergencies and the occurrence of natural disasters.

**Article 13: Access to justice**

1. States Parties shall ensure effective access to justice for persons with disabilities on an equal basis with others, including through the provision of procedural and age-appropriate accommodations, in order to facilitate their effective role as direct and indirect participants, including as witnesses, in all legal proceedings, including at investigative and other preliminary stages.
2. In order to help to ensure effective access to justice for persons with disabilities, States Parties shall promote appropriate training for those working in the field of administration of justice, including police and prison staff.

**Article 15: Freedom from torture or cruel, inhuman or degrading treatment or punishment**

1. No one shall be subjected to torture or to cruel, inhuman or degrading treatment or punishment. In particular, no one shall be subjected without his or her free consent to medical or scientific experimentation.
2. States Parties shall take all effective legislative, administrative, judicial or other measures to prevent persons with disabilities, on an equal basis with others, from being subjected to torture or cruel, inhuman or degrading treatment or punishment.

**Article 16: Freedom from exploitation, violence and abuse**

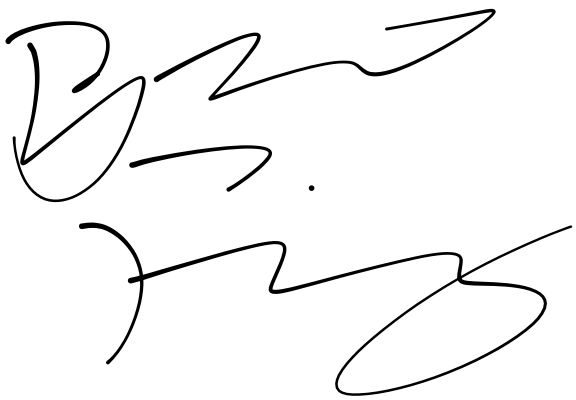

1. States Parties shall take all appropriate legislative, administrative, social, educational and other measures to protect persons with disabilities, both

within and outside the home, from all forms of exploitation, violence and abuse, including their gender-based aspects.
2. States Parties shall also take all appropriate measures to prevent all forms of exploitation, violence and abuse by ensuring, inter alia, appropriate forms of gender- and age-sensitive assistance and support for persons with disabilities and their families and caregivers, including through the provision of information and education on how to avoid, recognize and report instances of exploitation, violence and abuse. States Parties shall ensure that protection services are age-, gender- and disability-sensitive.
3. In order to prevent the occurrence of all forms of exploitation, violence and abuse, States Parties shall ensure that all facilities and programmes designed to serve persons with disabilities are effectively monitored by independent authorities.
4. States Parties shall take all appropriate measures to promote the physical, cognitive and psychological recovery, rehabilitation and social reintegration of persons with disabilities who become victims of any form of exploitation, violence or abuse, including through the provision of protection services. Such recovery and reintegration shall take place in an environment that fosters the health, welfare, self-respect, dignity and autonomy of the person and takes into account gender- and age-specific needs.
5. States Parties shall put in place effective legislation and policies, including women- and child-focused legislation and policies, to ensure that instances of exploitation, violence and abuse against persons with disabilities are identified, investigated and, where appropriate, prosecuted."

-Article 11, 13, 15, and 16 UN Convention on the Rights of Persons with Disabilities

I swear under penalty of perjury this Affidavit is complete and true to the best of my knowledge.
Signed on the 8th of November 2026 at Travelodge Plus 44 Townsend ST Rm 120 Dublin 2 (Ireland)
Respectfully submitted,
/s/Borealis S Hedling

Hedling, B. S. (2026). The Geometry of Institutional Enclosure: Formal Vectorization of Transnational Repression and Administrative Denial of Remedy (RFC-006). Zenodo. https://doi.org/10.5281/zenodo.24060722

# The Geometry of Institutional Enclosure: Formal Vectorization of Transnational Repression and Administrative Denial of Remedy

Author: Hedling, Borealis Serenity
Affiliation: NDH-RESEARCH-PILOT / Independent Researcher
Status: Open Request for Comments (RFC-006)
Date: November 8, 2026
Repository Hook: Borealiscodes/remedy-harness-bridge

## Abstract

This document delivers the technical specifications, architectural rationale, and international legal foundations for remedy-harness-bridge (v1.0.0). This runtime framework maps qualitative accounts of transnational repression (TNR) and systemic denials of remedy onto high-dimensional latent manifolds. By combining non-activating taxonomies (TonalSpiralGeometry v1.0) with causal structural filters (CAUSA) and stack-allocated vector runtimes (StaticArrays.jl), this system establishes a mathematical baseline to evaluate institutional failure.
We model bureaucratic attrition not as an accidental operational bottleneck, but as an intentional vector of systemic violence. This analysis evaluates state-sponsored obstruction against established international peremptory frameworks, demonstrating that systematic administrative exclusion constitutes a crime against humanity violating Jus Cogens, Erga Omnes, the ICCPR, UN CAT, the UN Charter, the American Convention, the ECHR, and the UNCRPD.

## 1. Introduction and Structural Construction

Traditional human rights tracking frameworks frequently collapse when confronting systematic, state-coordinated administrative exclusion [Stell, 2026]. Hostile actors routinely employ dual-use bureaucratic levers—such as bad-faith filing rejections, jurisdictional loop-holes, clerical delays, and complex standing rules—to build a protective layer of plausible deniability around targeted harassment and extra-territorial persecution. In RFC-005, this phenomenon was formalized as "math-washing": the practice of utilizing complex, rule-based processes to disguise deliberate human rights failures as routine administrative data [Hedling, 2026].
The remedy-harness-bridge architecture addresses this issue by translating qualitative text records into strict geometric structures. The tool converts descriptive entries from the us-domestic-remedy-exhaustion-stage1 repository into un-normalized state vectors within a five-dimensional coordinate space ($\mathbb{R}^{5}$).

### 1.1 The Extraction-to-Manifold Handshake

The compilation pipeline processes information through four separate, isolated structural safety zones:
1. Taxonomic Tokenization: Raw log entries are categorized into discrete fields using the non-activating parameters of the TonalSpiralGeometry_Block_v1_0 ontology block. This step tracks structural indicators such as TSG.spiral_stage and TSG.tonal_band without activating dynamic simulations [Borealiscodes, 2026].
2. Causal Invalidation Filter: The system maps tokens to coordinate arrays and processes them through the CAUSA engine [Stell, 2026]. It executes directional ownership calculations against a 1,000-pass permutation baseline to discard background administrative noise and confirm causal interaction.
3. Immutable Static Mapping: Surviving vector structures are passed via memory streams to a native Julia engine [Bezanson et al., 2017]. This environment loads coordinates directly into stack-allocated SVector primitives, locking down the invariant lower bounds ($\Vert\mathbf{\rho}\Vert > 10^{-12}$) to eliminate micro-rounding interpreter drift [Holy, 2023].
4. Manifold Isolation Auditing: The system computes the local angular divergence ($d_{\mathrm{geo}}$) across isolated institutional manifolds: Judicial ($\mathcal{M}_{A}$), Municipal ($\mathcal{M}_{B}$), and International ($\mathcal{M}_{C}$). This process isolates structural patterns where separate branches coordinate to deny administrative access.

## 2. The Existential Paradox: Why This Tool Should Not Exist, and Why It Must Exist

### 2.1 Why This Tool Should Not Exist

In a functional international legal order, the quantification of human suffering through high-dimensional differential geometry would be considered an unnecessary abstraction. This tool should not exist because the mechanisms of justice—the execution of non-discretionary statutory duties, the issuing of writs of mandamus, and the provision of open access to court systems—ought to be transparent, legible, and directly accessible through simple text and natural language.
The necessity of building an enterprise-grade geometric firewall to track legal access represents a significant failure of the rule of law. It demonstrates that modern legal systems have grown so complex and inward-looking that human rights defenders must deploy tools designed for algorithmic interpretation just to demonstrate that an institution has ceased to perform its statutory functions.
Furthermore, this tool carries inherent risks of co-optation. The methods used here to map administrative enclosure could easily be inverted by sophisticated state actors. Adversaries could use these frameworks to build automated legal barriers, designing procedural structures engineered to remain just above our detection thresholds while ensuring absolute exclusion.

### 2.2 Why It Must Exist

Conversely, this tool must exist because natural language text records have proved vulnerable to systematic distortion by state bureaucracies. Modern transnational repression does not always rely on open violence; it frequently operates through administrative attrition. When a human rights defender faces coordinated extra-territorial persecution, the host state's administrative apparatus often defaults to procedural avoidance rather than offering protection. When defensive networks present clear, narrative accounts of state-sponsored harassment or bad-faith clerical rejections, institutions routinely dismiss these reports as isolated incidents, subjective complaints, or harmless procedural errors. Text-based documentation can be ignored, redacted, or tied up in years of bad-faith litigation.

Geometry, however, cannot be dismissed by administrative maneuvers. By compiling narrative tracking files into immutable coordinate manifolds, we shift the conversation from subjective interpretation to verifiable structural realities. When hundreds of case files consistently group into identical, isolated failure regions, the system's underlying patterns become undeniable.

This tool must exist to provide human rights defenders with the defensive frameworks required to keep international institutions honest. It strips away the protective cover of procedural jargon, revealing systematic exclusion as an un-diverted, coordinate-level choice.

## 3. The Asymmetrical Geometry of Transnational Repression

Transnational repression (TNR) operates on a steep systemic imbalance. Authoritarian regimes exploit the open infrastructure of democratic host states—using global financial systems, digital platform moderation tools, and open legal filings—to harass, isolate, and neutralize dissidents across international boundaries.

The victim experiences this pressure as a multi-layered, tightening spiral:

$$\text{[Symbolic\ Harassment]}\longrightarrow \text{[Digital\ Intrusion]}\longrightarrow \text{[Administrative\ Freeze]}\longrightarrow \text{[Physical\ Containment]}$$

When targets seek protection from host-state institutions (such as municipal police forces, federal law enforcement agencies, or local courts), they encounter an un-coordinated, fragmented response. Authoritarian states operate with unified strategic intent, whereas the host nation's defensive frameworks are split across isolated jurisdictions, distinct budgets, and competing agency directives.

The adversary exploits these institutional gaps. A target facing active digital intrusion and cross-border financial harassment may find their case dismissed by municipal law enforcement due to lack of local jurisdiction. Simultaneously, federal oversight bodies may defer to diplomatic protocols, while local courts deny emergency relief by citing sovereign or qualified immunity doctrines.

The host nation's internal bureaucracy effectively amplifies the adversary's efforts. The target is trapped in a closed, recursive legal circle, burned out by the energy required to navigate a system that treats each step of a coordinated campaign as an isolated error. The remedy-harness-bridge addresses this imbalance by providing a unified, multi-tenant manifold. It allows tracking networks to combine disparate events across municipal, federal, and international jurisdictions, revealing the coordinated nature of the underlying threat.

## 4. Bureaucracy as a Systemic Crime Against Humanity

The core legal argument of RFC-006 is that the systematic use of administrative and bureaucratic processes to deny access to human rights remedies constitutes a systemic crime against humanity.
When an administrative apparatus deliberately coordinates its procedural mechanisms to isolate a targeted population, strip them of legal status, reject their protective filings, and immunize their abusers, it is no longer operating as a neutral civil service. It has transformed into an active framework of systemic violence. This structured administrative exclusion violates the foundational principles of international law across several distinct frameworks:

### 4.1 Jus Cogens and Erga Omnes

The prohibition of systematic discrimination, torture, and extra-territorial persecution belongs to the domain of Jus Cogens—peremptory norms of international law from which no derogation is permitted [International Law Commission, 2001]. Because these rights are absolute, states owe an obligation Erga Omnes (towards the international community as a whole) to prevent their violation and ensure effective access to remedy [International Court of Justice, 1970].
When a state uses qualified, absolute, or clerk-level quasi-immunities to bar individuals from seeking protection against transnational violence, it violates its Jus Cogens duties. A state cannot use its internal statutory regulations to escape its non-derogable international obligations.

### 4.2 International Covenant on Civil and Political Rights (ICCPR)

Article 2(3) of the ICCPR mandates that state parties guarantee an effective remedy to any person whose rights are violated, ensuring that claims are evaluated by competent judicial, administrative, or legislative authorities [ICCPR, 1966].
The use of automated, bad-faith filing rejections, excessive administrative hurdles, or continuous jurisdictional deferrals directly violates this mandate. It turns a binding treaty right into a hollow procedural fiction.

### 4.3 UN Convention Against Torture (UN CAT)

Article 14 of the UN CAT explicitly guarantees victims of torture and extra-judicial state violence the enforceable right to fair and adequate compensation, including the means for full rehabilitation [UN CAT, 1984].
When administrative structures systematically block access to these remedies by invoking complex state-secrets doctrines or procedural standing limits, they fail to meet their treaty obligations under the UN CAT.

### 4.4 The United Nations Charter

The UN Charter builds its framework on the foundational principles of the sovereign equality of states and the universal respect for, and observance of, human rights for all [UN Charter, 1945].

Coordinated administrative obstruction that targets human rights defenders directly undermines these principles, weaponizing domestic legal architectures against the core values of the international community.

4.5 Regional Conventions (American Convention on Human Rights & ECHR)

• American Convention (Article 25): Guarantees everyone the right to simple, prompt, and effective recourse to a competent court or tribunal for protection against acts that violate their fundamental rights [American Convention, 1969].
• European Convention on Human Rights (Article 13): Secures the absolute right to an effective remedy before a national authority, regardless of whether the violation was committed by persons acting in an official capacity [ECHR, 1950].
The systematic use of procedural attrition to run down statutes of limitations or exhaust the financial resources of a claimant constitutes a direct violation of these regional protections.

4.6 UN Convention on the Rights of Persons with Disabilities (UNCRPD)

Article 13 of the UNCRPD mandates that states parties ensure effective access to justice for persons with disabilities on an equal basis with others, providing procedural and age-appropriate accommodations [UNCRPD, 2006].
When institutions introduce overly rigid, complex, and unaccommodating administrative barriers—ignoring explicit accessibility requests while moving forward with fast-tracked case dismissals—the system functions as an illegal mechanism of exclusion that violates binding international disability mandates.

5. Conclusion and Operational Call for Comments

The remedy-harness-bridge provides human rights monitoring networks with the mathematical tools required to measure, map, and expose systematic institutional failure. By translating qualitative accounts of administrative obstruction into immutable coordinate manifolds, this荒 architecture strips away the cover of bureaucratic deniability, revealing systemic exclusion as an explicit, measurable choice.
We invite formal methods auditors, systems researchers, and international legal scholars to review this framework. Comments should focus on strengthening our verification invariants and refining our coordinate projection metrics to ensure the system remains completely resilient against adaptive administrative counter-measures.
